

**INVITATION
SOFTWARE AG INTERNATIONAL USER GROUPS
CONFERENCES**

**May 07-11, 2012
Berlin, Germany**

Dear Member, dear Customer,

It gives me pleasure to invite you today on behalf of the representatives of Software AG's International User Groups to the 2012 conferences, which will be held in Berlin from May 7 to 11.

Berlin is the capital of Germany and with a population of 3.45 million people Germany's largest city. It is a city of culture, politics, media and science and a very popular tourist destination. With its history and special urban atmosphere it is a popular location for international film productions. The city is well known for its architecture, arts, festivals and the high quality of living. We are happy to be able to hold our conference in such a unique location.

The meetings of the International User Groups offer a high degree of value for all Software AG customers. The opportunity to network is only one important aspect. Customers share their ideas and experiences with other customers as well as with Software AG. The conference is an excellent platform to communicate one-on-one with Software AG experts and get insights into current and planned research activities. Product changes and enhancements are discussed and voted on.

The agenda for the week covers all Software AG product groups. We will have sessions for Adabas/Natural as well as for webMethods and ARIS. The general track on Wednesday with a selection of prominent speakers will be of interest to all attendees.

Please join us in Berlin for this excellent chance to get in direct contact with Software AG experts and with your peers from around the globe. We will all profit from this exchange. If you have ideas or suggestions for agenda topics or would like to present at the conference, please send your proposal to either myself or the representatives of your groups. The active participation of our customers will significantly contribute to the success of the conference.

Please book your conference participation and hotel reservation by completing the registration form at <http://www.softwareag.com/iug2012> by April 15, 2012.

The announcement of the event along with agenda topics will be posted in Empower soon. There you can also find further information to keep you updated until the start of the conferences.

If you personally are unable to attend these conferences, please feel free to forward this invitation to other interested parties within your company.

We look forward to seeing you in Berlin.

Yours sincerely,

Software AG

Bernd Gudat
