INVITATION
SOFTWARE AG INTERNATIONAL
USER GROUPS CONFERENCES

JUNE 23-27, 2008
SEVILLE, SPAIN

Dear Member, dear Customer,

We are pleased to invite you to this year's conferences of Software AG's International User Groups. Responding to your feedback we will continue with the concept of a common conference for all International User Groups within the same week at the same location. The conferences for the Adabas, Natural and webMethods User Groups will take place from June 23 - 27, 2008 in Seville, Spain, the capital of Andalusia. Seville, the warmest and one of the most beautiful cities in Europe is more than two thousand years old and has a rich history. As an example, Seville played an important role in the discovery of America. In 1492 Christopher Columbus started his first exploration here, and his tomb can be visited in Seville Cathedral.

Based on your feedback and requirements from customers we will offer some training sessions around the conference. And following customer requests we propose to hold CentraSite sessions parallel to the webMethods User Group sessions. We believe this could be the successful start of a CentraSite User Group embedded in the International User Group community.

Please join us in June and don't miss the opportunity to discuss your requirements with Software AG Development and Business Division staff. You will also be able to share your experiences with other Software AG customers. From your feedback from last year's conferences we have learned that we should put greater emphasis on customer presentations. Therefore, I would like to encourage you to send your presentation proposals to either myself or the representatives of the groups. It is also helpful for us as your vendor to learn from your experiences.

Please book your conference participation and hotel reservation by completing the **registration form** at https://survey.webmethods.com/ss2/wsb.dll/52/IUG_2008.htm by **May 30, 2008**.

As usual you can find the announcement of the event in ServLine24 along with agenda topics and further information to keep you updated until the start of the conferences.

If you personally are unable to attend these conferences, please feel free to forward this invitation to other interested parties within your company.

We look forward to seeing you in Seville.

Yours sincerely,

Software AG
